

# H<sub>2</sub>S PREVENTING YEAST COMPARISON

SPECIES    KINETICS    TEMPERATURE RANGE    COLD TOLERANCE    ALCOHOL TOLERANCE    KILLER FACTOR    NITROGEN REQUIREMENTS    FLOCCULATION    CONVERSION FACTOR    GLYCEROL    VOLATILE ACIDITY    SO<sub>2</sub> PRODUCTION    FOAM PRODUCTION

<b>VIVACE</b>	<i>s. Bayanus</i>	Moderate - Fast	13 - 30 °C	9 °C	16%	Active	Medium - High	High	16.9 g/L	7.5 - 9.5 g/L	Low	Very Low	Low
---------------	-------------------	-----------------	------------	------	-----	--------	---------------	------	----------	---------------	-----	----------	-----

<b>ALLEGRO</b>	<i>s. Bayanus</i>	Moderate	16 - 28 °C	13 °C	16%	Active	Medium	High	16.3 g/L	5.0 - 7.0 g/L	Low	Very Low	Low
----------------	-------------------	----------	------------	-------	-----	--------	--------	------	----------	---------------	-----	----------	-----

<b>ANDANTE</b>	<i>s. Cerevisae</i>	Moderate - Fast	18 - 35 °C	15 °C	17%	Neutral	Low - Medium	High	16.4 g/L	7.0 - 9.0 g/L	Moderate	Low	Low
----------------	---------------------	-----------------	------------	-------	-----	---------	--------------	------	----------	---------------	----------	-----	-----

<b>MAESTOSO</b>	<i>s. Cerevisae</i>	Moderate	18 - 25 °C	15 °C	16%	Neutral	Medium - High	High	16.6 g/L	7.0 - 9.0 g/L	Moderate	Very Low	Moderate
-----------------	---------------------	----------	------------	-------	-----	---------	---------------	------	----------	---------------	----------	----------	----------

<b>BRIO</b>	<i>s. Cerevisae</i>	Moderate - Fast	18 - 30 °C	16 °C	16%	Active	Medium	High	16.5 g/L	6.0 - 8.0 g/L	Low	Moderate	Low
-------------	---------------------	-----------------	------------	-------	-----	--------	--------	------	----------	---------------	-----	----------	-----

<b>OSSIA</b>	<i>s. Hybrid</i>	Moderate	18 - 32 °C	15 °C	16%	Active	Medium	Medium - High	16.5 g/L	6.0 - 8.0 g/L	Low	Very Low	Low
--------------	------------------	----------	------------	-------	-----	--------	--------	---------------	----------	---------------	-----	----------	-----
